I bought it on sale for \$4.34 and frankly it's not even worth that.. The Game = Hotdog guy gets promoted to sports surgeon, uses a variety of items 'handy' to him to get the jobs done (ie toothpick and ketchup) Very goofy, good for a de-stress and giggle.

Fun game. Quite Short, with funny, quirky and competitive achievements.

. About what you'd expect from a puzzle game. The soundtrack was semi-decent.. Bugged piece of crap as usual when Uplay is involved, cant even get the DLC to work.. well i will try twitch.tv ... alright do this and that ohh h.240 need to be enable so i can twitch. ok so will do that let me close this pop up (pop up) o am lol aigan (pop up) for real (pop up) well so i least can record (press mouse 1) (anoyng sound as hell) all right so i thinck i will unistall them install..... nvm i thinck i have clound files..... nvm i dont..... 3 times unistaled them installed same error and cant change it bah...

The most intriguing part about this game is the mystery-shrouded behind the steam urls in some of these achievements. I didn't go very far in campaign mode yet. I played it long enough to unlock Survival Mode, and that's what I've played since.

This is meant to be a mobile game, I think, but it works just fine as a time killer on PC. It's cute, polished, and more than a little bit addictive. It's a strategy game more than a puzzle game (in survival mode, anyway.)

Someone else compared it to Triple Town--which I've played a lot of--and it is similar in that three of a given thing joint together to make a bigger thing. The similarity really ends there though because the object here is not JUST to make the bigger thing, but to place it so that it stomps the enemy's things, before the enemy stomps yours. Additionally, you can earn pink crystal thingies which you can use to move a creature, or to buy a creature, and there are fruit thingies which (I think) give you more points, so sometimes it's good to pause and think about where you are actually going to put the next creature.

Great game for those who like small, cheap, cute, colorful, strategy games. I'm happy with my purchase of this one.. don't buy if you expect great graphic quality, this game is made in RPGmaker2000. lol
Just enjoy the story and the game's theme.

some time the counter attack button seems to not work..

and I've got irritated of how the game didn't let you click the finishing blow by yourself.. Fun, Halloweeny humor. A typical village build game. Decent mechanics, smooth playability.. Quite an addictive little game..... Note that the game is in Early Access(Feels like alpha), once it gets released it's definitely worth buying it for its price.

I've spent around 2 Hours playing this game and unlocked quite a bit in the game. There are a few issues to pinpoint and the gameplay is really repetitive and mostly the same over and over. as you progress further levels get harder and so do bosses. the game offer quite a bit.

The game is missing quite a lot of sounds so it feels very empty while playing the game.

As for being a 5\$ Product i would say it's a Good game.

I encountered a bug where the boss somehow charged outside the map, but i was saved by a talent point that i had not chosen yet that spawned a goblin that could range the boss down.

Other than that there weren't that many issues and i would say for a price of 5\$ go for it.. Great exploration game. Find your own meaning.. I'm On Observation Duty is basically a hidden object game....if a hidden object game was actually scary and had atmosphere. I'm not saying it's scary all the time. Sometimes it can be quite boring in fact. And often, you will have NO IDEA what has changed in the scene you're looking at to the point that you can get quite frustrated from dying despite having no clue what could have possibly killed you.

I know it sounds like I'm leading towards a bad review but it's actually quite the opposite. The gameplay is actually kind of addictive. I just wish I could figure out what the things are that I'm missing. I've played the game several times now and can't seem to get as far as I'd like. I have really enjoyed most of my time with it though.

I definitely recommend the game but it is for certain people only in my opinion. If you're the kind of person that likes to look at several pictures and then try to determine what's different about one of them - then this is probably the game for you. You'll be trying to memorize the scenes and then figure out what has changed as time goes by. There are some basic memorization skills involved as well (example: memorizing the number of chairs that way if an extra one appears or one disappears, you can tell).

If you're on the fence about this one, I started a video series on Youtube. Feel free to check that out and decide for yourselves if you think it's worth your time and money:

You enter in an abandoned mansion, shoot some punks in the face, read a couple of old books, put your finger in a flytrap and then blast your head off. Brilliant.. Fun and challenging. The Watchmaker is an action-puzzle game, which visuals and mechanics pleasantly reminds me American McGee's Alice and Alice: Madness Returns.
